

CALL FOR SPEAKERS

Case Management is a complex career choice, which involves being an advocate, leader, influencer, problem-solver, educator and much more! In every work setting and within healthcare in general, there is a common challenge; how to meet our clients' needs in an industry that is continually evolving.

In support of case managers, CMSUK continues to forge the future for this rapidly expanding healthcare profession. Conference presentations are designed to spark conversations and innovations, provide strategies and solutions, along with practical tools and successful initiatives for professional case managers and people who work within the case management sphere.

CMSUK want to ignite that spark, so if you are a professional, an expert or a person with personal experiences that relate to any of the topics below – then please join our conversation by presenting at the CMSUK Conference March 2024.

Please email hayley.williamson@cmsuk.org

Topics

- Restoring people back into the community
- Moving out of the community into supported living.
- A Deputy, decision making and managing finances.
- The broken statutory system.
- Supporting people through rehab.
- Early management of clients with suicidal ideation
- Pain and emotion – how are they linked?
- Alternatives to CBT or EMDR in trauma psychotherapy
- The “hidden” brain injury – identifying and managing mild to moderate cognitive limitations
- Management of leg length discrepancy
- What is a sports therapist and how can they help with rehabilitation from traumatic injury?
- Medico-legal reports – issues of disclosure, privilege and impact on clients
- Caring for the carer of a client – making a case for input under the rehab code
- Talking to a client about issues of sexual function post trauma
- Innovative ideas in assistive aids and equipment (items you wished you’d always known about)
- Gait analysis
