

Access to Vaccinations for COVID-19 – Further Information

Dear member,

Further to our communication yesterday, we were contacted by a member who had made a complaint to the DHSC regarding the national accessibility for companies that are registered in one county and have support teams nationwide. A meeting involving the DHSC, NHS, ADAS, LGA and HCA took place yesterday to find a solution to this problem.

Communications will be sent to each local authority to accept eligibility from other local authorities. For example, if you are registered in Lancashire you can use this eligibility to access vaccinations in other areas.

A National Booking Service will be set up for support teams to contact and book their vaccinations in their locality. This service was trialled last week and may be available as soon as next week (currently awaiting timescales).

All local authorities will be obliged to provide contact details on their website for their vaccination teams so that providers who are eligible can contact them.

We will continue to update you on any further information we receive.

Best wishes,

The CMSUK Board
