

CMSUK Virtual Conference: 11-12 November 2020

Save the date for the UK's first virtual case management conference

Dear member

We are delighted to announce that CMSUK will be hosting the UK's first ever virtual case management conference from 11-12 November 2020. Titled "*Rebuild Restore Recreate: The power of creative collaboration*", this online event will feature an exciting programme of keynote speakers, presentations and a virtual exhibition.

COVID-19 has presented significant challenges to health professionals and case managers across the world. It has resulted in fundamental changes to the way we operate our businesses and interact with colleagues and clients. Some of these changes were forced upon us in order to survive. Others harnessed the innovation that often accompanies adversity. The common thread is that all of these changes, no matter their origin, represent the power of creativity and collaboration in a time of crisis.

CMSUK, like other organisations, has had to adapt to this brave new world and are proud to be able to deliver our highly respected annual case management conference in a first-of-its-kind virtual format.

This year's conference will highlight the "power of creative collaboration" and shine a spotlight on how we are all "rebuilding", "restoring" and "recreating" our industry.

Further details will be released over the coming weeks. In the meantime, please save the date for this industry-leading event!

Kind Regards

CMSUK
