

**1. What is your biggest current frustration as a brain injury case manager?**

- Being unable to see clients face to face
- Speed at which funding is agreed for rehab following submission of INA
- Having to deal with all rehab and support teams virtually
- A lack of specialist residential brain injury units as a result of Covid-19
- Inexperienced PI lawyers in the area of brain injury
- Other

**2. When do you anticipate (due to the scientific evidence) being able to refer brain injured clients to residential-based rehabilitation programmes?**

- I'm making referrals now
- 1 – 3 months
- 3 – 6 months
- 6 – 12 months
- In excess of a year

**3. Do you think the UK will face a “tidal wave” of brain injury rehabilitation need, post Covid-19?**

Yes      No

**4. Post Covid-19, is brain injury rehabilitation going to be more reliant on the private and charitable sectors due to stretched NHS resources?**

Yes      No

**5. Virtual rehabilitation is currently a substitute for more traditional forms of rehab while social distancing measures remain in place. Do you feel this is essential to ensure your client's rehab and mental health needs are being met?**

Yes      No

**6. With social distancing measures likely to remain in place for some months, do you anticipate an increase in the use of outdoor activities in rehabilitation plans for brain injured patients?**

Yes      No

**7. Do you have clients where a different and unique approach combining rehab and outdoor activity could be beneficial for a longer term ABI rehabilitation?**

Yes      No
